SAA-C03 · ML SERVICES · 2026 STATUS

ML Services: What's Current for the Exam

Checked against the SAA-C03 exam guide v1.1 (published Oct 29, 2026) and AWS lifecycle pages · built 2026-11-07

BOTTOM LINE

The exam's ML list went from **11 services to 8**. **Forecast, Fraud Detector and Kendra were removed.** The other 8 are still live; only some of their *features* changed. Study these 8 at "keyword → service" depth. **Bedrock** was not added: it appears on neither the in-scope nor the out-of-scope list.

In scope: the 8 to know (exam guide v1.1, Machine Learning category)

Service	Scenario keywords	What it does today	Changed since the course
Comprehend	sentiment of reviews, entities, PII in text	NLP on text: sentiment, entities, key phrases, language detection, PII detection	FEATURE CUT Topic modeling, event detection, prompt-safety classification closed to new customers (2026) → Bedrock LLMs / Bedrock Guardrails
Lex	chatbot, voice bot, conversational interface	Conversational bots: ASR + NLU; intents, utterances, slots; Lambda fulfilment	V1 RETIRED Lex V1 support ended Sep 15, 2025. Only Lex V2 exists; same concepts
Polly	read text aloud, lifelike speech	Text → speech; SSML controls delivery	ACTIVE Now 4 voice engines: Standard, Neural, Long-form, Generative
Rekognition	objects/faces in images, moderate uploads	Image + stored-video analysis: labels, faces (compare, search collections), scene text, moderation, celebrities, PPE, Custom Labels	FEATURE CUT Streaming Video (Kinesis Video Streams) & Bulk Image Analysis closed to new customers Apr 30, 2026. People Pathing ended Oct 31, 2025
SageMaker AI	custom model, data scientists, own algorithm	Build/train/deploy your own models. Studio (IDE), Canvas (no-code), JumpStart (pre-trained models); endpoints: real-time, serverless, async (≤1 GB, ≤1 h)	RENAMED "SageMaker AI" since Dec 2024. Canvas replaces Forecast. Several add-on features in maintenance (see below)
Textract	scanned forms, invoices, IDs, PDFs	Document OCR + structure: forms (key-value), tables, queries, signatures, layout; invoice/receipt, ID and lending APIs	ACTIVE No lifecycle change. Queries, Layout, Signatures and Analyze Lending are newer features
Transcribe	transcribe calls, captions, searchable audio	Speech → text, batch + streaming; speaker diarization, custom vocabulary, PII redaction, toxicity detection	ACTIVE No lifecycle change. Call Analytics (sentiment, summaries, categories) and Medical variants
Translate	localize site, multilingual chat	Neural text → text translation, real-time or for document sets in S3	ACTIVE No lifecycle change

Dropped from the in-scope list (all three were in the 2023 exam guide)

Service	Lifecycle status	AWS's suggested replacement	If an older practice question asks
Kendra	MAINTENANCE since Jun 30, 2026; closed to new customers Jul 30, 2026	Bedrock Knowledge Bases (managed RAG)	"intelligent enterprise search" → Kendra
Forecast	CLOSED to new customers since Jul 29, 2024	SageMaker Canvas	"time-series demand forecast" → Forecast
Fraud Detector	CLOSED to new customers since Nov 7, 2025	SageMaker AI, AutoGluon, AWS WAF Fraud Control	"fraudulent payments/sign-ups" → Fraud Detector

Look-alike pairs the exam tests

Scenario needs	Pick	Trap
Speech → text	**Transcribe**	Polly (the reverse)
Text → speech	**Polly**	Transcribe
Fields from forms, invoices, IDs	**Textract**	Rekognition (scene text)
Faces, objects, unsafe images	**Rekognition**	Textract
Meaning of text (sentiment, PII)	**Comprehend**	Translate
A bot that holds a conversation	**Lex**	Polly (voice only)
No pre-built API fits the task	**SageMaker AI**	Any pre-built API

- **Pipelines:** Transcribe → Translate → Polly (spoken translation); Transcribe → Comprehend (call sentiment).

SageMaker AI: what's still current

- CURRENT Studio, Canvas, JumpStart, training jobs, inference endpoints.
- MAINTENANCE Closed to new customers Jul 30, 2026: A2I (human review), Clarify, Debugger, GeoSpatial, Ground Truth (labeling), Model Monitor, Role Manager, Studio Lab.
- ENDED Ground Truth Plus (Jun 30, 2026). Profiler is in sunset.

Not worth study time

- **Officially out of scope:** Personalize, HealthLake, Inferentia, Deep Learning AMIs/Containers, PyTorch/TensorFlow/MXNet on AWS.
- **On neither list:** Bedrock (generative AI foundation models via API). Recognize the name as a distractor; don't study it. Amazon Q Business also moved to maintenance on Jul 30, 2026.
